THE NEW CROSS-CUTTER FOR FOIL CONVERTERS

In addition to big inline-cross cutting machines **EMB** now also offers cross-cutters for cutting companies.

These compact format cutting machines are especially designed according to the **requirements of foil confectioners**. **High flexibility** for several materials and **short modification times** when a format has to be changed distinguish this cutting machine from others. Reliable technics combined with **experience for more than 60 years in machine manufacturing** at an economical price.

Unwinding in different executions, foil edge control, longitudinal cutting units for edge trimming and multi usable formats. Stacking by manual or automatic table lowering and many other options are possible. Big format ranges can be covered.

Very high cutting quality and strict tolerances of the segments at high throughput make this cross-cutter to a really economic and efficient all-rounder for your cutting companies.

SUPERIOR TECHNOLOGY

- **High machine speed**
up to 100 cuts/min
- **Individual processing widths**
500 mm – 2.000 mm
- **Also for big reel diameters**
up to \varnothing 1.000 mm, weight until 2 t
- **Latest control technique**
servo controlled AC-motors, pivoted and adjustable Touch-Panel, plain text
- **Latest IT-Technology**
for communication, diagnosis, service and recording of production and operator data via Internet
