WINE AND SPARKLING WINE CAPSULE MACHINES

For more than 60 years, we are developing and producing trendsetting wine and sparkling wine capsule machines. With our innovative, modular systems as well as many optional applications, we even realize highly individual solutions – exactly according to your customer's requirements.

The following capsule applications are available:

- Embossing on capsule skirt and top-disc
- Hot-foiling on capsule skirt and top-disc
- Incisions, perforations and punching
- Horizontal tear tab with incisions and aluminium tongues
- Ink printing with UV-drying on top-discs

- Vertical tear tab with incisions and hologram anti-counterfeit strips
- Longitudinal grooves, separation rings or distance cams
- Special decorations on top-disc or big diameter, preformed top-discs

In its easiest form, the used capsules consist of a wound and glued skirt as well as a sealed top-disc. Materials used are printed or unprinted foil reels of crossstretched plastic, aluminium or complex foil and paper.

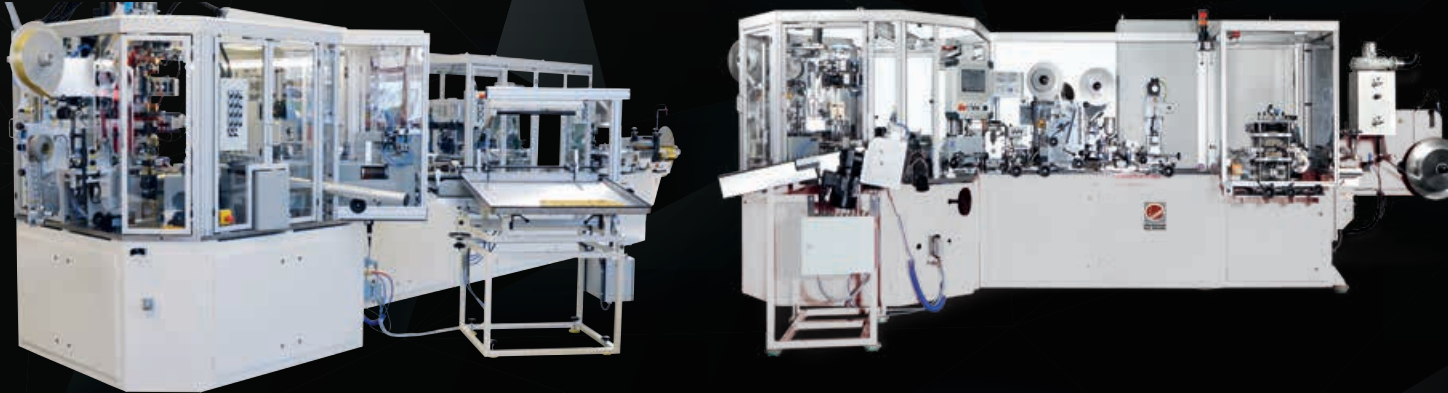

All capsule geometries and designs are possible

Main wheel 12 or 16

Multicolor Hotstamping etc.

Capsules for all application

Many options for decoration

SPARKLING WINE CAPSULE MACHINE

- **High Quality**
 - Finest Decoration
 - Synchronized Hot Stamping Positioning
 - Accurate Perforation
 - Reliable Separating, etc.
- **High Speed**
 - up to 180 Capsules/Minute
- **High Level**
 - Multi Color Hot-Stamping
 - Folded or Domed Head
 - Full or Partial Embossing, etc
- **High Flexibility**
 - Aluminium/Polylaminat and Paper
 - Fast Changeover
 - Customized Equipment
 - Quality Detection

- **High Economic**
 - Touch Panel with recipe management
 - Industry 4.0 capable
 - Online support

WINE CAPSULE MACHINE

- **High Quality**
 - Precise Overlapping
 - Parallel Seam
 - Brilliant Hot-stamping
 - Colored Embossing on Top, etc
- **High Speed**
 - up to 280 Capsules/Minute
- **High Level**
 - C-Perforation
 - Hot-Stamping on Skirt and Top
 - Tear Tab, etc.
- **High Flexibility**
 - Aluminium/Polylaminat, PVC/PET and Paper
 - Fast Changeover

- Customized Equipment
- Integrated Quality control
- **High Economic**
 - Touch Panel with recipe management
 - Industry 4.0 capable
 - Online support
